

So, in a nutshell, tokenomics is like having a special piggy bank full of digital coins that you can use to buy things or do stuff in a special place called a blockchain.

What is tokenomics? And why is it so important?

So, in a nutshell, tokenomics is like having a special piggy bank full of digital coins that you can use to buy things or do stuff in a special place called a blockchain.

- Clarify the number of tokens, their usage, and their purposes
- “Design of your token system” i.e.
- Keep the interest of token holders (not just another shitty coin)
- Prevent negative outcomes
